

## AGRONOMY

The East Coast Rural Agronomy Team has extensive experience in broad acre crops, horticultural crops and pastures. ECR Agronomy draws on its local expertise in selection, timing and application of seed, chemical and fertiliser products to give customers the greatest chance of achieving the highest possible yields and quality produce.

## AG CHEMICALS

ECR carry a full range of Agricultural Chemicals which are supported by Agronomic Advice and Recommendations. ECR support & partner with the major Ag Chem suppliers.

## FERTILISER & NUTRITION

Nutrient management is the key to sustainable soil fertility and crop yield. The right agronomic recommendation of NPKS fertiliser to provide high return on investment for growers over the short and longterm is essential. We can also supply trace elements in fertiliser blends to correct soil deficiencies in one pass.

## SEED

With partnerships with all the major seed suppliers, ECR has access to all your seed requirements including pasture, lucerne, canola, pulse and vegetable seeds.

## ANIMAL HEALTH

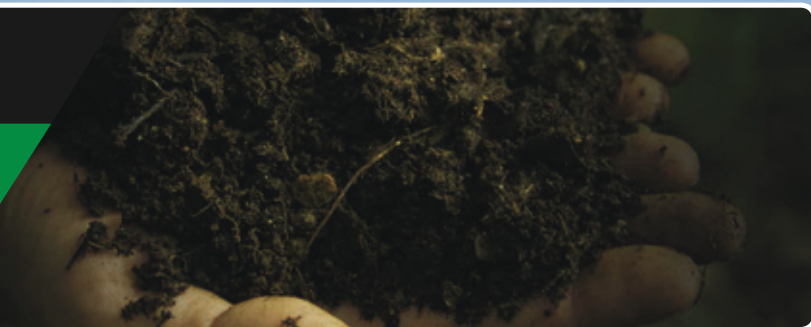

ECR supplies a large range of animal health products including drenches, vaccines and nutrition supplements. Contact the staff for all your livestock requirements.

## ORGANIC FERTILISER & SOIL CONDITIONERS

East Coast Rural can supply sustainable & organic options for the nutrient management on your farming operations to ensure a productive balanced soil without significant reductions in crop yields.

## SOIL & TISSUE TESTING

We can provide on farm testing for Soil, Deep N, Seed and Tissue results to assist with making informed decisions before and during the growing season. Full results and Agronomic recommendations are provided with each soil or plant test.

## FIELD MAPPING

East Coast Rural uses the latest GIS mapping software and other specialised data to utilise in precision farming operations. Satellite/Drone NDVI, NIR and NDRE images can be used to gain an insight into exactly how the crop is performing and when/where to apply fertiliser, fungicide or herbicide applications.

## FENCING & GENERAL MERCHANDISE

ECR stock a wide range of general farm merchandise for your operations. Our sales staff supply fencing materials and fencing tools for small and large projects, with a wide range of products to suit various applications from rural fencing to commercial and industrial fencing.

## IRRIGATION & WATER

ECR can assist you with your water needs in selecting the most suitable products for water supply and delivery systems for livestock and domestic applications, right up to installing centre pivots and laterals. We stock a wide range of quality irrigation products from a range of leading suppliers. We can also provide assistance with water efficiency, water security and water trading.
